

To Do

- Boot selection options (Boot0 pin, bootloader modes)?
- Determine voltage regulator from 5 V to 3.3 V
- Determine footprint size of connectors, buttons and components
- Calculate component values for LED's and Reset button
- Capacitors around IC's
- 3.3V Rail; Stable or not? How do we reduce voltage ripple?
- Figure out clock signal to STM32
- Remember to buy JTAG/SWD Programmer

Features:

- Long distance communication between CANBus and Supporting Vehicle
- TPMS Receiver
- USB interface
